

TERMINAL CHECK VALVE

TECHNICAL PASSPORT

POLYESTER TERMINAL CHECK VALVE

CBT9200A

APPLICATION

TECOFI terminal check valve is used to protect pipes against the rise of fluid and the passage of animals

Areas of use: Treatment of domestic and industrial wastewater, irrigation, networks, rainwater and runoff reservoirs

Fluids: clear water, waste water, rain water, surface water, sea water.

GENERAL CHARACTERISTICS

Range: from DN200 to DN1500.

- Body and plate in polyester resin reinforced with glass fibers.
- Low mass structure with minimum face to face
- Easy and quick instauration
- Reduced pressure drop.
- Installation at the end of the networks on a vertical wall or a standard flange.
- Perfect seal ensured with gasket conforming to standard NF EN681-1.

Product advantage:

- Low weight for high pressure resistance
- Great long-term resistance to weathering, UV, ozone, to chemical attacks, mechanical stresses.
- High resistance to corrosion thanks to the 316 stainless steel stem.

STANDARDS

Connection	ISO PN10 flange mounting
